Dear Josh,

I shall have one day to put my strain collection on a computer. I am of course sure that you did that a long time ago. Would it be possible, or not, to have the program you certainly have designed for this and to know on which type of machine you did it, what was the language of the program, the input medium (discs, cards, drums, etc.).

Thank you very much in advance,

With very best regards and also to Esther,

Yours sincerely,

12/10/66

François JACOB
